

Full Stack Developer

Developer with a professional certification (bachelor equivalent). During the two years of my degree, I have split my time between classes and working full-time as a full stack developer. I have gathered experience in designing features for a web app, maintaining and updating existing code, deploying production code and using Agile and SCRUM principles. I am French and I am looking forward to moving to Denmark for the climate, proximity to the sea and the booming tech market.

UML/Merise

Responsive design

Accessibility

Git et GitHub/GitLab

Visual design

French - native

English - fluent

Danish - basics

Work Experience

October 2022 -> June 2025 - Full Stack web developer

L'Agence WAM, Lyon, France - SEO consulting Agency

I worked on an internal search listening tool called benhur

- I was involved in the design process for the application's new features and wireframes

- Built the front-end interface (React/Redux/Recharts)

- Updated our back-end to meet the application's needs

(Python/FastAPI/PostgreSQL)

- Maintained and updated our ETL (CSV file import and external APIs)

- Deployed on the Google Cloud ecosystem with Docker

- Worked in a team of 3-5 people using Agile principles and GitLab

- Wrote product documentation
